Senior Systems Named Semi-Finalist for SEA Operational Excellence Award

Palmdale, CA – November 2, 2011 – [Senior Systems](#), a mid-tier electronic manufacturing services (EMS) company serving the Medical, Commercial/Industrial, CleanTech and Military/Aerospace industries has been named a semi-finalist for a 2011 Operational Excellence Award by the Supplier Excellence Alliance (SEA).

SEA is an aerospace and defense non-profit alliance founded by prime and tier-one companies, and led by sub-tier suppliers committed to accelerating supply chain performance. Each fall, the organization names winners in seven different categories: Operational Excellence, Leadership & Culture, Workforce Development, Supply Chain Innovation, Customer of the Year, Leadership Excellence, and Most Improved Using SEA Metrics.

Senior Systems is one of nine semi-finalists in the category of Operational Excellence, which also includes Alaska Airlines. “We are proud to be among such distinguished company,” said Tim Morrissey, Senior Systems President and CEO.

According to the SEA, semi-finalists are among the few and rare breed of suppliers who have distinguished themselves by making an uncommon investment in improvement. In many cases, the difference between the winners, finalists and semi-finalists is very small. This year’s 44 semi-finalists were chosen from more than 670 nominees nationwide.

“We are certainly hopeful that our nomination is a precursor to winning our category,” states Morrissey, “but nonetheless, I am extremely proud of the Senior Systems team in achieving semi-finalist status.”

Winners will be announced at the 2011 SEA Awards Gala on November 17, 2011 at the Hyatt Grand Champions Resort in Indian Wells, California.

Senior Systems Technology, Inc.
600 Technology Drive
Palmdale, CA 93551

Senior Systems provides contract electronics manufacturing services to advanced technology companies primarily in the Medical, Commercial/Industrial, CleanTech and Military/Aerospace sectors. The company's capabilities include design for manufacturability and testability, prototype and production circuit board assembly, materials procurement and control, manufacturing and test engineering support, complete box-build, and final product packaging and logistics.

As a full service EMS provider, Senior Systems is ISO 9001:2008, ISO 13485:2003 and AS9100 certified, ITAR registered and FDA registered to build medical devices/products.
