Senior Systems Featured in *Manufacturing Today* Magazine

Palmdale, CA – October 20, 2011 – [Senior Systems](#), a mid-tier electronic manufacturing services (EMS) company serving the Medical, Commercial/Industrial, CleanTech and Military/Aerospace industries is the focus of a feature article of the Fall 2011 issue of *Manufacturing Today* magazine.

The quarterly publication analyzes Best Practice strategies of the most successful firms in the manufactured goods marketplace. These “case studies” serve as benchmarking tools for a broad spectrum of companies, from aerospace to electronics, transportation to consumer products.

The article, “Head of the Class,” focuses on Senior Systems’ state-of-the art capabilities and equipment, which have led to the firm’s continued growth. Gregg Mozdy, Senior Systems’ vice president of business development, attributes the growth to a simple, but critical, difference: “We outperform what our customers would expect.”

As an example, *Manufacturing Today* cites the story of a CleanTech company breaking into the wind power market. The customer initially chose another EMS manufacturer over Senior Systems due to a lower bid, but the other firm was not able to ramp up in time and the customer quickly turned back to Senior Systems. Says Mozdy, “We helped [the] company capture a market window that they would have missed if they had stayed with the other manufacturer.”

The *Manufacturing Today* article highlights Senior Systems’ lean manufacturing, experienced staff, and nimble, customizable operation, and summarizes the company’s unique market position as combining “the state-of-the-art capabilities, technology and equipment of a large manufacturing operation with the dedication and loyal service levels of a much smaller firm.”
