**Senior Systems Introduces “Partner Portal” Website Feature**

Palmdale, CA – September 7, 2011 – [Senior Systems](#), a mid-tier electronics manufacturing services (EMS) company serving the Medical, Commercial/Industrial, CleanTech, and Military/Aerospace industries, announces the addition of a “Partner Portal” feature to its website.

While the idea of direct customer interface with a company’s website is not new, Senior Systems’ Partner Portal is one of the most comprehensive, accessible, and robust among mid-tier EMS companies.

“Senior Systems’ Partner Portal offers a level of transparency and accountability rarely seen in the EMS industry,” notes Brian Wisemore, Senior Systems’ Director of Supply Chain.

The system goes far beyond the ability to securely upload documents or receive manufacturing reports, which are common in the industry.

“It literally lets customers look into our manufacturing systems, giving them 100% real-time data,” added Wisemore. “Nothing is hidden.”

The Partner Portal allows customers to log in to see specifics of the manufacturing process of their projects, 24 hours a day, seven days a week. The system can track individual assemblies, and even individual parts by their serial numbers. Wisemore notes these features are especially valuable to customers in the Medical and Aerospace industries.

While the Partner Portal offers a number of useful tools and functions, Wisemore says the most commonly used features are accounts receivable, quality metrics, and real-time work-in-progress reports.

Wisemore describes the Partner Portal as “a living, breathing thing,” emphasizing that Senior Systems would continue to refine and improve the system’s features, based on customer input. “We’re committed to increasing the value of this tool, to better meet our customers’ needs,” he says. “We want to make doing business with Senior Systems easier.”

Senior Systems is an industry leader among EMS providers, specializing in high reliability, high-cost-of-failure assemblies for the Medical, Commercial/Industrial, CleanTech, and Military/Aerospace market sectors. As a full service EMS provider, the company’s capabilities include design for manufacturability and testability, prototype and production circuit board assembly, materials procurement and control, manufacturing and test engineering support, complete box-build, and final product packaging and logistics.

Senior Systems is ISO 9001:2008, ISO 13485:2003, and AS9100 certified, ITAR registered, and FDA registered to build medical devices/products.
