**For Immediate Release**

**Senior Systems Featured in *San Fernando Valley Business Journal* Cover Story**

Palmdale, CA – November 14, 2011 – [Senior Systems](#), a mid-tier electronic manufacturing services (EMS) company serving the Medical, Commercial/Industrial, CleanTech and Military/Aerospace industries is the focus of a cover story article in the November 7th issue of *The San Fernando Valley Business Journal*.

The award-winning publication covers business news in the manufacturing, technology, healthcare, financial, and real estate industries in the greater San Fernando Valley area, which encompasses the region between Los Angeles and San Francisco.

The cover article, “Low Risk Contract,” focuses on Senior Systems’ recent growth and high-reliability manufacturing. While the company’s core business has always been in defense work, Senior Systems’ upper management recognized that other markets such as alternative energy and healthcare also require the same extremely reliable, high-quality manufacturing capabilities.

The article quotes CEO Tim Morrissey’s realization that the company could take its expertise in high-level military equipment and successfully apply it to other areas in the commercial segment.

As a result, Senior Systems is focusing on what it sees as an under-served area of “high-cost-of-failure” applications where a failure in the field could result in serious injury, death or dire financial consequences.

The company, which employs more than 140 workers, has a diverse array of projects currently underway – ramping up production of a controller assembly used in wind turbines, WiFi assemblies for an industrial/telecom customer, PCBA’s for medical diagnostic equipment and triggering devices for oil and natural gas drilling operations.
