Senior Systems Launches New Website

Palmdale, CA – August 10, 2011 – [Senior Systems](#), a mid-tier electronic manufacturing services (EMS) company serving the Medical, Commercial/Industrial, CleanTech and Military/Aerospace industries, announces the launch of its newly redesigned website.

“Our new website makes it fast and easy for both current and prospective customers to find the information they’re looking for,” says Tim Morrissey, President and CEO. “It not only looks great, it’s far more user-friendly.”

With a new color scheme and large photos throughout, the website is brighter and has more visual impact. However, the biggest change is a drop-down menu that makes it faster for users to navigate the site and find specific content of interest.

On the Home page, a mouse-activated, mobile-friendly, jquery slider feature reveals an overview of News, Certifications, Recent Awards and the Partner Portal. Each of these ‘mini pages’ can be clicked to take the viewer to that section for more detailed information.

Other highlights of the Senior Systems website include:

Web Video

A web video on the Home page invites viewers to take a “virtual tour” of Senior Systems and get a general overview of the company’s services, culture and principles.

News and Press

A news and press section lists the latest developments, events and services at Senior Systems, and catalogues past postings.

Job Postings

This section lists employment opportunities at Senior Systems. It enables visitors to view current job openings and apply online.

Environmental Pledge

This page shows the specific steps the company takes to keep its operations as earth-friendly as possible.

Contact

A large Home page button provides an easy way for current or prospective customers to quickly contact Senior Systems for more information.

Senior Systems is an industry leader among EMS providers, specializing in high reliability, “high cost of failure” assemblies for the Medical, Commercial/Industrial, CleanTech and Military/Aerospace market sectors. As a full service EMS provider, the company’s capabilities include design for manufacturability and testability, prototype and production circuit board assembly, materials procurement and control, manufacturing and test engineering support, complete box-build, and final product packaging and logistics.

Senior Systems is ISO 9001:2008, ISO 13485:2003, and AS9100 certified, ITAR and FDA registered to build medical devices/products, as well as being an NSA-approved supplier under the COMSEC standard.
